

**Because we care about our children's learning,  
we respectfully request that the Government  
reverse its policy of increasing class sizes.**

To the House of Representatives

**The Government's new ratio of 1:27.5 for all students in years 2 to 10 will affect tens of thousands of students and result in the loss of more than 1000 teaching positions over the next five years.**

**Research shows that smaller class sizes:**

- Have a positive effect on children's reading and maths
- Are particularly beneficial for children in their first few years of schooling
- Make a significant difference to vulnerable children who are struggling with their learning.
